## ABOUT ME

Frontend developer student at Jensen YH, expanding skills in React, HTML, CSS, JavaScript, and Frontend frameworks. Also pursuing .NET Cloud Developer studies at IT-Högskolan, focusing on Microsoft Azure cloud, Azure DevOps, database management, and user-friendly interfaces. Actively seeking LIA internships and job opportunities to enhance skills and engage in practical development projects.

## EDUCATION

### **Frontend Developer Student, JENSEN(Yrkeshögskolan)** 2023 – ongoing

- JavaScript: Developed dynamic web pages for improved user experience and reactive functionality.
- React: Ongoing studies and high motivation to apply the knowledge in practice
- CSS: Designed web pages, with responsive design for all devices, Bootstrap, including a three-part homepage.
- HTML: Created the structure of web pages with HTML elements and improved visual presentation.
- API (Application Programming Interface): Communication between applications with JSON. Created web applications to fetch and send data.
- Node.js and Express: Fundamental understanding of server-side JavaScript with Node.js.
- Figma: Skilled in Figma for collaborative design, wireframing, and prototyping.
- Agile Project Methodology and Testing, UX/UI, Packaging, Delivery, and Follow-up.

### **.NET Cloud Developer Student, ITHS(Yrkeshögskolan)** 2023 – ongoing

- C# and .NET: Implemented problem-solving oriented programming, developed interactive .NET applications.
- Entity Framework: Experience in Code First and Database First, designed and implemented database models in Blazor application for a bookstore.
- GUI: Created interactive interfaces, including a quiz game with the ability to play, edit, and create new quizzes saved as JSON files.
- Node.js and Express: Developed server-based applications with Node.js and Express.
- Azure: Hosted the database in Azure for a CRUD application with cloud-based database management.
- Database Management: Experience with SQL Server, MongoDB, Cosmos DB, SQL Server Management Studio, including the use of stored procedures, relational databases, and SQL/NoSQL query languages like Firebase.
- Agile Methods, Cloud Publishing and Distribution, Cloud Architecture.
